Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Awareness	Stage 2 Engagement	Stage 3 Utilization
Action (What does hel. customer do?)	- Looks for help to start conversations at networking events. - Discovers the Personalized Networking Assistant.	- Enters interests, background, and event/context details. - Requests personalized conversation starters. - Uses fact-check to get verified information.	- Uses conversation starters in real networking interactions. - Saves conversations and gives feedback.
Touchpoint (What part of our service is they interact with?)	- Website / App landing page - Features and benefits overview - Demo / Screenshots	- User input forms - AI conversation starter suggestions - Fact-check interface	- Chat / Networking suggestions - Conversation history - Feedback & rating
Customer Thought (What is the customer thinking?)	- This might help me network better. - Is this tool easy to use? - Will it give relevant suggestions?	- These suggestions are relevant and helpful. - This information is accurate and useful. - This is saving me time.	- I feel more confident starting conversations. - This tool understands my needs. - I can improve my networking skills.
Customer Feeling (What is the customer feeling?)	- Curious - Hopeful - Slightly unsure	- Engaged - Satisfied - Relieved	- Confident - Happy - Motivated

Process Ownership (Who is responsible at this stage?)	• Marketing Team • Product Team	• Product Team • AI/ML Team • Backend Team	• Product Team • Customer Support Team • Data Team
Opportunities (How can we improve this stage?)	• Improve awareness through social media and partnerships. • Add video demos and testimonials.	• Enhance AI accuracy and personalization. • Provide more topic categories. • Improve fact-check speed and sources.	• Add conversation analytics and insights. • Enable export and sharing of conversations. • Improve feedback collection and support.
