Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>[Presentation Layer]</i>	Provides an interactive user interface where users enter event details, generate conversation starters, perform fact-checking, and view conversation history.	Streamlit
<i>[API Gateway]</i>	Receives requests from the frontend, validates inputs, routes requests to backend services, and returns responses.	FastAPI
<i>[Microservices]</i>	<i>Modular backend services for event analysis, topic generation, fact-checking, history logging, and feedback logging.</i>	<i>FastAPI service modules</i>
<i>[Database]</i>	<i>Stores conversation history and feedback locally for retrieval and future improvement. JSON files: history.json, feedback.json</i>	<i>JSON files: history.json, feedback.json</i>
