Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	N/A
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	N/A
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes

10	Demo video or walkthrough (if required)	Yes
----	---	-----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Personalized-Networking-Assistant/ <pre> ├── app/ │ ├── services/ │ ├── routes/ │ ├── models/ │ └── main.py ├── tests/ │ ├── test_event_analyzer.py │ ├── test_topic_generator.py │ ├── test_fact_checker.py │ └── test_routes.py ├── streamlit_app.py ├── requirements.txt ├── README.md ├── .env.example └── assets/ </pre>

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Localhost Deployment
Login Credentials (Demo)	Not Required

Platform / Hosting Provider	Local Machine
Repository Link	Your GitHub Repository Link
Demo Video Link	Not available

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites

Python 3.10+

pip

Git

Internet connection (for Wikipedia API)

Steps

1. Clone the repository.

2. Run pip install -r requirements.txt

3. Configure the .env file if required.

4. Start FastAPI backend:

uvicorn app.main:app --reload

5. Start Streamlit frontend:

```
streamlit run streamlit_app.py
```

6. Open:

Streamlit UI: <http://localhost:8501>

FastAPI Swagger: <http://127.0.0.1:8000/docs>

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Requires internet for Wikipedia fact checking	Internet connection required
2	User authentication is not implemented	Planned for future enhancement
3	Cloud deployment not available	Runs successfully on Localhost
